Projects

DCTI | Educational Website

[View Project](#) | [Project Code](#)

[Click Here](#)

Duration:- July 07-July 15

Website Overview:

- Serves as an online portal for the Dakshinkhan Computer Training Institute.
- Includes a login system, course information, and admin panel access.
- Structured for easy navigation between student-facing pages and admin tools.

My Contribution:

- Developed frontend and backend from scratch using PHP and JavaScript.
- Integrated login and authentication flow (login_from.php).
- Implemented navigation and redirection logic (e.g., app.js → courses_part / admin.php).
- Built dynamic content rendering via PHP (index.php).

Tech Stack:

- Bootstrap, CSS, JavaScript, PHP, MYSQL.

2.Male Fashion | E-commerce Website

Duration:- Jan 08 – Jan 12

[View Project](#) | [Project Code](#)

Website Overview:

- This is a male fashion e-commerce website showcasing a variety of fashion products.
- Built using HTML, CSS, JavaScript, PHP, and MySQL.
- Provides a smooth shopping experience with sections for product categories, featured items, and user accounts.

My Contribution:

- Developed both the front end and backend of the website.
- Ensured full responsiveness for an optimal user experience across all devices.

Tech Stack:

- HTML, CSS, JavaScript, PHP, MySQL.

3.Abanti |Ai Website

Duration:- Mar 25– Mar 30

[View Project](#) | [Project Code](#)

Website Overview:

- This is an Ai Website.
- Built using HTML, CSS, JavaScript and API of Gemini

My Contribution:

- Developed both the front end and set the API.
- Ensured full responsiveness for an optimal user experience across all devices.

Tech Stack:

- HTML, CSS, JavaScript.
